

Planning, Development, and Design

About PD+D

Planning, Development, and Design – a department within the division of Institutional Planning and Operations – integrates the areas of planning, development, real estate, design, environmental graphics, space management, and construction technology to promote a more holistic approach to planning at Rutgers University.

PD+D balances efficient programming with thoughtful design to create an evolving, safe, functional, and inviting environment that advances the university’s threefold mission of education, research, and public service.
