

REHS Biosafety

WHAT WE REGULATE

A black and white illustration of a DNA double helix structure.	Recombinant and synthetic genetic material
A black and white illustration of a spherical virus particle with numerous surface proteins and spikes.	Pathogenic microorganisms [Affecting humans, plants, and/or animals]
A black and white illustration of several rod-shaped, flagellated microorganisms, likely bacteria.	Select agents and toxins
A black and white illustration showing a neuron with its cell body and branching processes, along with several red blood cells.	Human material and human cell lines
A black and white illustration featuring a cow, a magnifying glass over a DNA helix, and laboratory test tubes, representing genetic engineering in animals and plants.	Transgenic animals and transgenic plants
